## To meet any of your needs

Cellular concrete can be applied in different areas of work. Mining, flooring, roofing, manufacturing and geotechnical, are some of the possible applications.

**THERMAL**

**FLAME RETARDANT**

**ACOUSTIC**

# CELLULAR CONCRETE EVOLUTION

## Why Cellular Concrete?

Lightweight insulating concrete is produced at the work site by mixing cement, sand, water and stable preformed foam. The cellular concrete is produced to be pumped at greater distances. Achieving better results, clean work, quick jobs, and lower costs, the CC can be pumped to more than 60 floors from the ground floor.

## Low Cost

The qualities of cellular concrete make the saving of your work. Less quantity of materials, saving of personnel and wages, less use of machinery, making the C.C. a product to your need, with the best results and lower costs.
